PROFILE

During my urban planning education, I recognised that spatial decisions should be addressed not only intuitively, but also through data-driven and analytical methods aligned with the requirements of the digital age. Accordingly, I focus on Geographic Information Systems (GIS), Python, spatial data analysis, PostGIS and WebGIS technologies, transforming spatial data into more legible, actionable and user-centred decision-support systems.

More recently, I have focused on digitising urban planning processes through WebGIS-based mapping applications, real-time data services, spatial analysis infrastructures, and emergency and accessibility-oriented scenario development. I build end-to-end web-based GIS applications using GitHub, Docker, FastAPI, PostGIS, Render and Vercel.

My long-term goal is to specialise as a WebGIS developer by integrating urban planning, spatial analysis, 3D city modelling, digital twin systems and AI-assisted decision mechanisms, while creating innovative systems that contribute to the digital transformation of cities.

PROFESSIONAL EXPERIENCE

2023-PRESENT	**TMMOB, Izmir** Member, Chamber of City Planners
2024	**REPUBLIC OF TÜRKİYE, ÇEKMEKÖY MUNICIPALITY** Urban Planning Directorate - Mandatory Summer Internship
July 2025-PRESENT	**ORALL URBAN PLANNING AND ARCHITECTURE OFFICE** Authorised Urban Planner - Part-time

TECHNICAL SKILLS

3D & DESIGN	GIS TOOLS	PROGRAMMING	ANALYSIS TOOLS
Blender Sketchup AutoCAD Netcad DESIGN TOOLS Photoshop After Effects	QGIS ArcGIS Google Earth Engine ArcGIS Cityengine	SQL queries Python	SPSS Excell

PROFESSIONAL ATTRIBUTES

ENTREPRENEURSHIP · LEADERSHIP · TEAMWORK · INDUSTRY AWARENESS · RESOURCEFULNESS

WEBGIS PORTFOLIO & GITHUB

GitHub profile: https://github.com/GeoTech-Dila

I deployed a WebGIS application developed with GitHub-based version control, managing backend services through Render and frontend deployment through Vercel.

- Live WebGIS application: https://me-germany-states-webgis.vercel.app/
- Live WebGIS application: https://we-konya-webgis.vercel.app/

CERTIFICATIONS & PARTICIPATION

23-24 DECEMBER 2023	Netcad Certificate
2 MARCH 2024	Archify - Izmir - Vision Participation Certificate
31 JANUARY-1 FEBRUARY 2025	Climathon 2023
3 JANUARY 2026	Boğaziçi Institute - R&D; Projects Training Certificate
15 OCTOBER-7 NOVEMBER 2025	Universities Design and Art Graduation Projects Exhibition (ÜTAS), a major component of the Good Design Izmir event - Project title: “An Examination of the Central Districts of Sakarya Province through a Women-Friendly City Approach”
23 APRIL 2026	BASIC QGIS GEOGRAPHIC INFORMATION SYSTEMS TRAINING (GIS)
1 MAY 2026	PYTHON FOR GEOSPATIAL - COMPLETION CERTIFICATE

TÜBİTAK RESEARCH PROJECTS

- 2209-A - University Students Research Projects Support Programme
  Project Lead (Certificate of Achievement)
  Topic: Investigation of the Transportation-System-Oriented Urban Heat Island Effect and Development of Mitigation Strategies
- 2205 - Undergraduate Scholarship Programme, BİDEB
  Nine-month participation
  Topic: Evaluation of Urban Planning in Terms of Gender Equality Sensitivity and Disadvantaged Groups with Respect to Content, Decisions and Proposals

PLN 3111 URBAN PLANNING STUDIO III

UPPER-SCALE PLAN AND REPORT REVIEWS

- For Selçuk: analysis of assigned roles and values in the 1:100,000 Izmir-Manisa Regional Environmental Master Plan, explanatory report and plan provisions using tables, text and other graphical methods.
- For Selçuk: analysis of assigned roles and values in the 1:25,000 Izmir Metropolitan Environmental Master Plan, explanatory report and plan provisions using tables, text and other graphical methods.
- Analysis of the roles assigned to Selçuk under the Izmir Sustainable Urban Logistics Plan.

1:5,000 MASTER DEVELOPMENT PLAN REVIEWS

- Population and density calculations according to lower and upper limits
- Assessment of the spatial adequacy of social infrastructure areas under applicable regulations, including percentage and per-capita calculations
- Evaluation of social infrastructure areas under applicable regulations
- Transportation analysis

EXISTING CONDITIONS REVIEW

- Land-use conditions: blocks, parcels and buildings (building symbology may be based on function)
- Ground-floor function analysis (block average, presented at block level)
- Parcel function analysis (block average, presented at block level)
- Number-of-storeys analysis (block average, presented at block level)
- Parcel-size analysis (block average, presented at block level)
- Urban block size analysis
- Building coverage ratio - TAKS (block average, presented at block level)
- Floor area ratio - KAKS (block average, presented at block level)
- Regulatory assessment of the spatial adequacy of social infrastructure areas and percentage calculations

NATURAL ENVIRONMENT ANALYSES & CONSTRAINTS

Slope - aspect - elevation - contour - watershed delineation - flow direction - flow accumulation - erosion model - stream and flood - slope position - land surface temperature - vegetation indices (NDVI, EVI, SAVI or MNDWI) - albedo - solar exposure - topographic wetness index (TWI) - geological structure (ground and fault lines) - soil structure/classification - protected-site status and mapping (archaeological, natural and urban classifications)

Reports, tables and charts on population, labour force and regional services - neighbourhood population - age dependency - gender distribution - education statistics - migration - tourism capacity and international visitor distribution - agriculture and livestock statistics - employment and sectoral distribution - unemployment and labour force

Preparation of a revised 1:5,000 master development plan

URBAN PLANNING STUDIO IV | PLN 3112

POPULATION DENSITY & POPULATION ANALYSES

• Analysis of upper- and lower-limit population calculations under upper- and lower-limit population densities.

NATURAL ENVIRONMENT ANALYSES & CONSTRAINTS

Slope - aspect - elevation - contour - watershed delineation - flow direction - flow accumulation - erosion model - stream and flood - slope position - land surface temperature - vegetation indices (NDVI, EVI, SAVI or MNDWI) - albedo - solar exposure - topographic wetness index (TWI) - geological structure (ground and fault lines) - soil structure/classification - protected-site status and mapping (archaeological, natural and urban classifications)

3D TERRAIN MODELS

1:1,000 IMPLEMENTATION DEVELOPMENT PLAN REVIEWS

• Population and density calculations according to lower and upper limits
• Assessment of the spatial adequacy of social infrastructure areas under applicable regulations, including percentage and per-capita calculations
• Evaluation of social infrastructure areas under applicable regulations
• Transportation analysis

EXISTING CONDITIONS REVIEW

• Land-use conditions: blocks, parcels and buildings (building symbology may be based on function)
• Ground-floor function analysis (block average, presented at block level)
• Parcel function analysis (block average, presented at block level)
• Number-of-storeys analysis (block average, presented at block level)
• Parcel-size analysis (block average, presented at block level)
• Urban block size analysis
• Building coverage ratio - TAKS (block average, presented at block level)
• Floor area ratio - KAKS (block average, presented at block level)
• Regulatory assessment of the spatial adequacy of social infrastructure areas and percentage calculations

DEMOGRAPHIC ANALYSES

Reports, tables and charts on population, labour force and regional services - neighbourhood population - age dependency - gender distribution - education statistics - migration - tourism capacity and international visitor distribution - agriculture and livestock statistics - employment and sectoral distribution - unemployment and labour force

Preparation of a revised 1:1,000 implementation development plan

Revised 1:1,000 land readjustment plan - Article 18 implementation

1:1,000 site plan

PROFESSIONAL PRACTICE AREAS

Development Planning & Revision	Plan review, error detection, revision and technical consultancy
Transportation Planning	Minibus and service routes, road-network assessments
Cadastre & Property	Parcels, roads, road dedication and consent procedures
Conservation Planning	Registered buildings, conservation areas and restoration permits
Licensing & Implementation	Linking planning decisions with implementation and permit processes

SELECTED PROFESSIONAL PROJECTS & WORK

01 - Impound Lot Planning and Permit Process | Buca, Izmir

Contributed to the review of cadastral parcels, ownership information and existing development-plan decisions for an impound lot use; assessed road access and road-dedication conditions; researched required consent and licensing/permit procedures; and evaluated the use from an urban-planning perspective.

02 - Minibus Route Planning and Road-Use Rights Request

Contributed to the technical planning work for a minibus road-use rights request by reviewing the existing transport network and routes, evaluating relevant road connections, and developing a proposed minibus route.

03 - Additional Service Route Request and Route Planning | Selcuk, Izmir

Contributed to the assessment of an additional service-route request by reviewing the existing transport structure and road network, evaluating the service route, and preparing a proposed route to support the application.

04 - Development Plan Revision, Plan Review and Technical Consultancy

Actively contributed to a comprehensive review of an existing development plan; identified errors, deficiencies and inconsistencies in plan decisions and technical representations; evaluated and checked revisions intended to resolve the identified issues; and supported preparation of a technical planning consultancy report.

05 - Registered Building Restoration, Conservation and Permit Process

Contributed to the restoration-permit process for a registered building located within a conservation area by reviewing its conservation status and relevant planning conditions, evaluating the required approval procedures, and supporting the associated planning work.
